Mr. Farrell;

In reference to your recent request for a complete inventory of the drums and totes on our property containing non-hazardous waste water is as follows;

1244 X 55 gal. drums

270 X 200 gal. totes

This inventory was taken on June 20, 2011 under the observance of yourself. The above inventory is believed to be 95% correct, but should allow for some human error in the count, as this was done by walking the inventory and using our observations to ascertain the most accurate count we could generate.

Concerning the totes mentioned above, please note that 31 of the totes were delivered to Environmental Recovery Corp., Lancaster, Pa., 717-393-2627, this morning with an additional 31 totes, or around 6200 gallons of waste water, to be picked up the week of June 27<sup>th</sup>, 2011. That will leave 208 totes for disposal.

The disposal of the rest of the material as described above will take place using the following proposed schedule.

6200 gallon or 31 totes twice a month until Sept. 15<sup>th</sup> 2011, then

6200 gallon or 113 drums once per month until Dec. 31, 2011, then

6200 gallons or 113 drums twice per month until we have exhausted all or any stored waste water products stored at our facility.

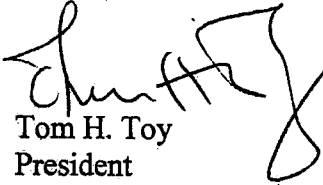

The above schedule is an estimate based on the acceptance by ERC Corp., or a similar company being able to dispose of the waste water. We foresee no difficulties in realizing these objectives, but cannot offer any firm guarantees. In fact, we do foresee a quickening of the schedule as the recovery becomes continuous and knowledge of the product being received by ERC is heightened allowing for a quicker turn around.

We have made arrangements for the cost of this operation, approximately \$2000 per delivery, to quicken the output.

In reference to the drums of dirt we observed on the property, this dirt came from the digging and the expansion of the foundation, when the new plant was built 11 years ago. There was not a problem with it, but was the top layer which had asphalt millings that were used to create the previous driveway. We will use or dispose of this dirt post haste.

I hope that the above inventory and our initial proposal for disposal is acceptable to your office. Any questions concerning this matter will be answered in a fast and forthright manner.

Thank you.
